Cassava Collection

WHERE DESIGN AND TECHNOLOGY MEETS NATURE

The Cassava Collection, designed by renowned Danish architect and designer Lars Vejen, is the result of Danish design and Indonesian craftsmanship.

The lamp is made of paper from the cassava root vegetable, stretched across a rattan frame. The two materials grow in Indonesia and are chosen because of their natural strength, pure beauty, and functionality and because they are a renewable resource.

Indonesian artisans skillfully shape these lamps by hand, giving a warm, organic look and feel.
